

**Prysmian Group**, leader in anticipating the world's energy and communications needs, is looking for a

**Installation Project Engineer (f/m/d)** based in **Bayreuth**  
to help us shape the future.

#### **WHO WE ARE LOOKING FOR:**

- 2-3 years of experience in a similar role
- Knowledge of the land cable installation business/market
- Knowledge of installation engineering tasks typical of land HV systems.
- Knowledge of and familiarity with all basic and common software like Microsoft Project, Word, Excel, AutoCAD, and in the use of the Web.
- Capacity to understand and conceptualize complexity into concise frameworks
- Flexibility and capability to manage changes during the work
- Honours degree in technical engineering (Civil Engineering preferred)
- Fluent German and English is a must

#### **KEY RESPONSIBILITIES**

The Installation Engineer will support the Lead Installation Project Engineer in the overall installation work package of the SuedOstLink project.

You will be using cutting edge technologies, including unprecedented cable products that are yet to be seen on the market for their upcoming project. Become part of a new team who will be leading large-scale projects, which will transform the future of energy utilisation!

#### **More about the SuedOstLink Project**

Prysmian Group has been awarded a contract by TenneT TSO GmbH, the Dutch-German grid operator, for the SuedOstLink project in Germany - one of the longest HVDC underground cable connections so far. Worth approximately €500 million, Prysmian are to design, manufacture, supply, lay, joint, test and commission a 2GW underground cable system through the TenneT region of this first German Corridor.
